

SPECTRAQUARTZ®

Colored Quartz

SPECTRAQUARTZ® is colored quartz that is permanently pigmented in an amazing array of distinctive colors, allowing you to transform ordinary floors and walls into inviting living and working spaces. It's the simple and elegant way to make a statement of style and quality!

Distinctive color, texture, and durability

Beauty. SPECTRAQUARTZ colors range from the subtlest tints to the brightest hues, adding visual interest and excitement to any environment. You're limited only by your imagination!

Strength and durability. Quartz is one of the hardest natural substances in the world, with great structural strength, durability, and resistance to abrasion and impact. SPECTRAQUARTZ also gives your floors added texture and slip resistance.

UV and chemical resistance. SPECTRAQUARTZ is UV, chemical, and acid resistant, and will retain its beauty and functionality for years. The SPECTRAQUARTZ thermal bonding process permanently binds the pigment to the quartz grain surface, ensuring that colors won't bleed or fade.

A wide range of colors and blends. Choose the perfect color or blend for your commercial or residential project. No other colored quartz product gives you so much freedom to create a uniquely special environment.

Environmentally friendly. SPECTRAQUARTZ is produced with an environmentally friendly pigment dispersion technology. SPECTRAQUARTZ contains no harsh solvents and is compatible with most resins used to coat floors and walls.

SPECTRAQUARTZ®

Colored Quartz

Standard Colors

Available in both fine and coarse grades.

Resins, sealants, and natural surroundings all play a part in determining finished color and appearance. We recommend confirming the actual color and testing in a small area before applying and installing your complete project.

All product is sold in solid colors. For blending, see your SPECTRAQUARTZ distributor or contact Covia Corp at 1.800.255.7263 for a blend formula chart.
